

## BullsEye!™ – Phone Number and Information Retrieval Service

**Keywords:** phone; look up; search; find; information; BullsEye; number; missing; company; contact; address

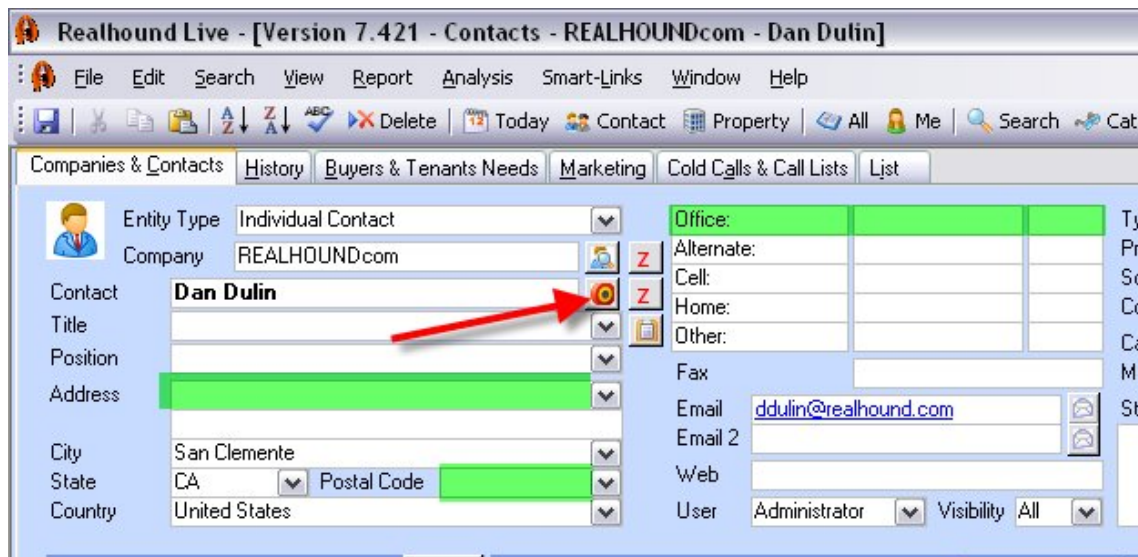

### Introduction (Please Read):

This document will help you understand Realhound.com's information retrieval technology, BullsEye!™, which allows you to search for missing and hard to find contact related data from within the program. BullsEye!™ will save you hundreds of hours of laborious research. Realhound.com's BullsEye!™ Information Retrieval technology is fully integrated into the application and provides one-click access to:

- Automatic phone number lookups for both published and non-published numbers
- Company and Individual address verification
- Reverse phone number lookups
- National Do Not Call (DNC) Verification
- Company and Individual address lookups
- One click updates to the existing contact record

### Steps:

**Step 1:** On a contact that is missing information click on the BullsEye icon to the right of the contact's name.

**Step 2:** Enter your BullsEye!™ Card number and your tokens balance will show. Then select the appropriate lookup option for the information you already have.

The BullsEye!™ results show up in the pane just below your contact information. If a match is found you can see all the information that BullsEye!™ located and you have the ability to choose what information you want to accept and update the contact record. There are options to accept just the address, only the phone number, or all missing data.
